Fang Plate®
Anterior Lumbar Buttress Plate
Patent # 8,685,069

• Fangs provide rotational stability with tripod fixation
• Smooth contours for vessel protection
• 8° Lordosis contours to spine to buttress against implant
• Broad wing span to prevent implant expulsion
• Large window for implant visualization
• Self-tapping 5.5 mm screw

TriLobe® Technology
Patent # 8,685,069

• Patented screw capture system developed by Eminent Spine
  • Screw will not back out due to typical linear force
